

**CD-32**

**CD-32** is a carboxylated acrylic copolymer emulsion designed for use as an associative thickening agent. **CD-32** is Alkyl Phenol Free thickener.

**CD- 32 Typical Properties :**

Solids Content	30±1%
PH	2.0-4.0
Thickening ability	50-70
Specific Gravity at 25°C	1.06
Surfactant Type	Anionic/ Nonionic
Freeze/Thaw Stability	Unstable

**Application :**

**CD-32** is recommended for use when the thickened lattice must have a short stringed rheological effect. Broad applications in Water based Emulsion Paints and Coatings. Most effective thickening range is in the pH range 8.5-9.5. The recommended dosage is 0.4-2 % with in the formulation. Thickening effect: 10 grams of **CD -32** on 340 cc water with 2 grams of ammonia (25%) added while stirring yields thickening effect of 2000 cps (Brookfield LVT SP-3, 30 RPM).

**Packaging :**

200-kilo lacquer lined metal drums with polyethylene inner liner, 1-ton polyethylene container.

**Storage :**

**CD-32** can be stored in original containers it is supplied in. Store in shade and protect from freezing.
