

VA-185

VA-185 is Vinyl Acetate acrylic copolymer emulsion with high water resistance designed for use as a binder in water based paints and coatings.

VA-185 Typical Properties :

Solids Content	53±1%
Viscosity at 25°C LVT 2/30	200-600 cps
PH	4.0-5.5
Particle Size	0.15-0.25 microns
Specific Gravity at 25°C	1.07
Surfactant Type	Anionic/Nonionic
Freeze/Thaw Stability	Unstable
Minimum Film Formation Temperature	+10°C
Tg	+20°C

Film Properties :

VA-185 forms a colorless, glossy, tough, flexible and non-tacky film. It has high tensile strength and wet abrasion resistance. **VA-185** has a superior elongation 300% until break.

Application :

VA-185 can be used in a wide range of emulsion paint formulations, for flat interior and exterior paints with excellent water abrasion resistance. Flexible textured coatings, crack fillers and putties.

Packaging :

200-kilo lacquer lined metal drums with polyethylene inner liner, 1-ton polyethylene container.

Storage :

VA-185 can be stored in original containers it is supplied in. Store in shade and protect from freezing.
